Zu dieser Broschüre

Die Kennzeichnung der Inhaltsstoffe kosmetischer Mittel ist dem Verbraucher inzwischen allgemein vertraut. Seit über 10 Jahren sind auf den Verpackungen kosmetischer Mittel europaweit alle eingesetzten Inhaltsstoffe in absteigender Reihenfolge ihrer Konzentration im Produkt zu finden. Die Inhaltsstoffe werden dabei mit der international einheitlichen INCI-Nomenklatur (INCI: International Nomenclature Cosmetic Ingredients) gekennzeichnet. Mit Hilfe dieser Nomenklatur ist es möglich, die in einem Produkt verwendeten Stoffe in allen EU-Mitgliedstaaten anhand einer und derselben Bezeichnung zu identifizieren. Der Verbraucher wird so in die Lage versetzt, Stoffe leicht zu erkennen, die er zum Beispiel wegen einer Unverträglichkeit meiden sollte, und zwar unabhängig davon, wo in der EU er das betreffende Produkt erwirbt.

Inzwischen werden auf fast allen Kontinenten kosmetische Mittel mit der INCI-Nomenklatur gekennzeichnet. Dies ist ein großer Schritt hin zu einer weltweiten Harmonisierung der gesetzlichen Regulierung kosmetischer Mittel. Vielfach wird der Wunsch nach einer Übersetzung der INCI-Bezeichnungen ins Deutsche geäußert. Da es sich bei diesen Begriffen aber in mehr als 90 % aller Fälle um Kurzversionen ihrer chemischen Bezeichnung in englischer Sprache handelt, ist eine Übersetzung für den Verbraucher in der Regel wenig hilfreich. Wichtiger ist hingegen eine Antwort auf die häufig gestellte Frage: „Welche Funktion hat der Stoff in diesem Produkt?“. Die vorliegende Broschüre hilft bei der Aufklärung: Jedem Stoff ist bzw. sind eine oder mehrere Funktionen zugeordnet, die dieser in kosmetischen Mitteln erfüllt. Die Funktionen werden in einer separaten Auflistung ausführlich erläutert. Bei pflanzlichen Inhaltsstoffen sowie im Falle von (meist lateinischen) Bezeichnungen alltäglicher Stoffe wie z. B. „Aqua“ (für Wasser) ist auch eine deutsche Übersetzung angeführt.

Eine erste aktualisierte Fassung des im Amtsblatt der Europäischen Gemeinschaften vom 01. Juni 1996 veröffentlichten Inventars¹, die in Kürze ebenfalls im Amtsblatt der EU veröffentlicht werden wird, stellt die Basis der vorliegenden Broschüre dar. Diese Liste umfasst nahezu 8000 verschiedene Stoffe.

Die Liste der INCI-Bezeichnungen wächst stetig weiter. Es ist daher möglich, dass einzelne, derzeit in kosmetischen Mitteln verwendete Inhaltsstoffe noch nicht in der vorliegenden Liste erfasst sind.

Diese Broschüre wurde federführend vom IKW erstellt; in Zusammenarbeit mit den österreichischen und Schweizer Schwesterverbänden FCIO und SKW. Die österreichische Gesetzgebung unterliegt ebenfalls der EG-Kosmetik-Richtlinie, sodass die Anforderungen hier identisch sind. Die schweizerische Kosmetik-Gesetzgebung ist inzwischen weitgehend der EG-Kosmetik-Richtlinie angepasst, so auch hinsichtlich der INCI-Kennzeichnung. Daher ist diese Broschüre auch für Schweizer Konsumenten von Interesse.

¹) Beschluss der Kommission vom 8. Mai 1996 zur Festlegung einer Liste und einer gemeinsamen Nomenklatur der Bestandteile kosmetischer Mittel; Amtsblatt der EU Nr. L 132 vom 01.06.1996, S. 1–684.

Einleitung

Vollständige Deklaration der Inhaltsstoffe – die informative Seite der Kosmetik

Seit Ende 1997 werden die Inhaltsstoffe kosmetischer Produkte in allen Ländern der Europäischen Union einheitlich gekennzeichnet. Grundlage bildet die so genannte „INCI-Nomenklatur“ (International Nomenclature Cosmetic Ingredients). Diese Kennzeichnung informiert im Detail über die Bestandteile kosmetischer Mittel und schafft damit ein hohes Maß an Klarheit und Transparenz.

Vor allem Allergiker profitieren von der Deklaration: Nach der Identifizierung ihrer individuellen Allergieauslöser werden diese Stoffe in einen Allergiepass eingetragen. So können sie kosmetische Mittel, die die betreffenden Stoffe enthalten, bereits beim Einkauf meiden.

INCI – klar und einfach

Auf allen Kosmetika innerhalb der Europäischen Union sowie auch in vielen anderen Ländern ist die Zusammensetzung der Produkte nicht nur vollständig aufgelistet – es werden auch für jeden Bestandteil einheitliche Bezeichnungen verwendet. Diese Begriffe sind in der „**Liste 1: Inhaltsstoffe und ihre Funktionen in Kosmetika**“ (ab Seite 11) aufgeführt.

Die INCI-Bezeichnungen für pflanzliche Inhaltsstoffe basieren auf dem System des schwedischen Naturforschers Carl v. Linné. Sie bestehen aus dem lateinischen Namen der Pflanze (z. B. CITRUS AURANTIUM DULCIS für die Süßorange), gegebenenfalls gefolgt vom verwendeten Pflanzenteil (z. B. PEEL – englisch für Schale) sowie der Art der Zubereitung (z. B. EXTRACT für einen Extrakt) – insgesamt also CITRUS AURANTIUM DULCIS PEEL EXTRACT für einen Orangenschalenextrakt. Die INCI-Bezeichnung für ein etherisches Öl aus Kamillenblüten lautet beispielsweise CHAMOMILLA RECUTITA FLOWER OIL. Die deutschen Übersetzungen der lateinischen Pflanzenbezeichnungen sind in der „**Liste 2: „INCI-Bezeichnungen von Pflanzen**“ (ab Seite 99) zusammengestellt.

Für einige alltäglich vorkommende Inhaltsstoffe werden die INCI-Bezeichnungen in Anlehnung an die Begriffe des Europäischen Arzneibuchs ebenfalls meist in lateinischer Sprache ausgedrückt, wie z. B. „AQUA“ für Wasser und „CERA ALBA“ für Bienenwachs. Die „**Liste 3: INCI-Bezeichnungen alltäglicher Stoffe**“ (ab Seite 138) bietet eine Übersicht über die INCI-Nomenklatur solcher Stoffe und die entsprechende Übersetzung in die deutsche Sprache.

Die INCI-Deklaration in der Praxis

Die Kennzeichnung gilt für alle bei der Herstellung verwendeten und im Fertigprodukt vorhandenen Bestandteile. Ihre Auflistung beginnt mit dem Hinweis „Ingredients“. Die Bestandteile werden mit ihren INCI-Bezeichnungen angegeben und zwar in absteigender Reihenfolge der Konzentration, d. h. der Menge, in der sie eingearbeitet sind – also der Inhaltsstoff mit dem größten Anteil am Anfang und danach alle anderen. Rohstoffe, die weniger als 1 Prozent der Gesamtbestandteile ausmachen, erscheinen am Ende in ungeordneter Reihenfolge.

Die Deklaration muss auf der äußeren Verpackung eines Produktes erscheinen. Wenn hierzu der Platz – z. B. bei Kleinartikeln – nicht ausreicht, werden die Angaben auf einer Packungsbeilage o. ä. aufgeführt, und auf der Verpackung wird darauf in verkürzter Form mit einem speziellen Symbol (einer Hand, die in einem offenen Buch blättert) hingewiesen.

Als weitere Möglichkeit kann bei Kleinartikeln, wie zum Beispiel Lippenstiften, auch ein Schild in deren unmittelbaren Nähe angebracht sein, das über die Bestandteile des betreffenden Produkts informiert. In diesem Fall muss das Symbol nicht auf die Packung gedruckt werden.

Sonderregelungen

Für Farbstoffe sind die gültigen INCI-Bezeichnungen die so genannten Colour-Index-Nummern. Bei dekorativen Kosmetika (z. B. Lidschatten), die in mehreren Farb-Nuancen angeboten werden, erfolgt eine Auflistung der verschiedenen Farbstoffe nach dem Zeichen „+/-“ in eckigen Klammern, z. B. [+/- CI 15580, CI 18965, CI ...]. Um nicht für jedes kleinformatige Einzelprodukt, beispielsweise einen Lippenstift, ein extra Etikett mit der individuellen Zusammensetzung an Farbstoffen erstellen zu müssen, können alle Farbstoffe auf einmal angegeben werden, die in einer Produktlinie vorkommen können.

Vergällter Alkohol wird mit „ALCOHOL DENAT.“ (alternativ mit „ALCOHOL“ und dem Namen des Vergällungsmittels) deklariert; Parfümöl werden mit „PARFUM“ und Aromastoffe mit „AROMA“ gekennzeichnet.

Die INCI-Kennzeichnung am Beispiel einer typischen Feuchtigkeitscreme

Stoffe und Funktionen	Deklaration des Produkts
Lösungsmittel (Wasser)	Aqua
Viskositätsregler	Polymethyl Methacrylate
Feuchthaltemittel	Propylene Glycol
Lösungsmittel (Fettkomponente)	Triisostearin
Tensid (oberflächenaktive Substanz)	Quaternium-18
Pflegestoff (Orangenextrakt)	Citrus Aurantium Dulcis Extract
Feuchtigkeitsspender	PCA
Filmbildner (Bienenwachs)	Cera Alba
Quellstoff/Verdickungsmittel	Ethylene/Propylene Copolymer
Konservierungsmittel (Paraben-Gemisch)	Methylparaben, Ethylparaben, Butylparaben, Propylparaben, Isobutylparaben
Parfümöl	Parfum
Farbstoff	CI 75120

So könnte also zum Beispiel eine Inhaltsstoffkennzeichnung auf einer Feuchtigkeitscreme aussehen:

Ingredients: Aqua, Polymethyl Methacrylate, Propylene Glycol, Triisostearin, Quaternium-18, Citrus Aurantium Dulcis Extract, PCA, Cera Alba, Ethylene/Propylene Copolymer, Methylparaben, Ethylparaben, Butylparaben, Propylparaben, Isobutylparaben, Parfum, CI 75120.
